

— PROFITX MASTERCLASS

Profit By DesignTM

Money **feels tight**. Things **feel off**.

FEELS LIKE

The bank account is always tight.

Money's moving, work is steady, but the balance never quite sits where you'd expect it to. You can't put a finger on why.

FEELS LIKE

You're flat out and going sideways.

The diary is full, the inbox is full, but the number landing in your account at the end of the month isn't really moving.

FEELS LIKE

You honestly can't tell if it's working.

No real number to point at. Just a feeling about whether the month was good or bad, and a quiet worry one slow month sends you backwards.

THE
PATTERN

You're running the whole business on how it *feels* — and feel is a terrible spreadsheet.

A business that **actually** pays you.

01

Know what you net every month.

A real number you can look at and trust, not a feeling about whether the month was good or bad.

02

Hire someone without flinching.

Model the wage on the sheet first, see how the month lands, decide with information instead of hope.

03

Steer the business on purpose.

Price up, drop a client, add a new tier, watch how it lands before it lands.

THE
DREAM

A business that fits your craft, pays for your life, and runs by design instead of accident.

You were stuck on "it feels like" too
— what changed when you actually
broke it down?

● OVER TO
YOU

What's **one thing** around money, finance, or understanding it that's troubling you?

● 2
MIN

Drop it in the chat, or come off mute. One sentence. The bit that nags you most.

Three things to look at. Three quick activities.

01 / YOUR WHOLE BUSINESS

A rough P&L

A simple picture of money in, money out, what's left. We'll do yours, live.

5 minutes

02 / YOUR OFFER

Your price brackets

A quick scribble of what you'd sell at three different levels. Off the top of your head.

4 minutes

03 / YOUR CLIENTS

Two clients, ranked

Pick two clients you already have and see who's really paying you and who isn't.

5 minutes

— 01 / YOUR ROUGH P&L

You can't steer what you can't see.

A P&L is just a one page view of your business. What's coming in, what's going out, what's left. You look at it every month. That's the whole job.

3 Core Areas.

IN

Revenue

What every client pays you this month.

—

OUT

Costs

Your time, your editor, your tools.

=

LEFT

Profit

What's actually yours at the end.

AS A %

Profit Margin

Profit ÷ Revenue. The health number you steer with.

A healthy business sits in **these ranges.**

GROSS MARGIN

50 **to 70%**

What it costs to produce the work — your time and your editor — should leave you sitting in this range.

NET MARGIN

30 **to 40%**

After everything (tools, subs, overhead), this is what's left.

You don't need to nail these today. You just need to know what good looks like, so you can see where yours sits.

Your rough P&L.

Grab your worksheet. Three numbers. Don't overthink any of them.

YOU \$40 /
hr

EDITING \$50 /
video

01 / REVENUE

Add up what your clients pay you this month.

02 / COSTS

Your hours to deliver × 40, plus videos produced @ \$50 per video.

03 / LEFT OVER

Subtract. That's the number that's actually yours.

05:00 FIVE MINUTES ON THE CLOCK

Three numbers.

Rough is fine. Don't overthink it. Stop running the business on *feel* — get a real number on the page.

01 REVENUE

\$

Roughly what your clients are paying you this month.

02 COSTS

\$

Hours to deliver × \$40 + videos × \$50.

03 LEFT OVER

\$

Revenue – Costs. The number that's actually yours.

MARGIN CHECK

Left over ÷ Revenue = your profit margin %. Healthy lands 30–40%.

● QUICK CHAT
CHECK

What did your **left over** number surprise you with?

● ²
MIN

Bigger than you thought? Smaller? Roughly where you expected? Drop a word in the chat — green, yellow, red.

— 02 / YOUR PRICE BRACKETS

People think they just need **more of the same** type of client.

— THE OTHER WAY

**What you actually need is a balance
of workload, margin and leverage.**

— WHAT THE THREE TIERS TEND TO LOOK LIKE

Three rough price points.

TIER 1 / HEADLINE	Full social, reels, ads, the works. The high-touch flagship.	\$3K to \$5K /mo
TIER 2 / MID	Less content videos, same management — with full-scale ads as an add on.	\$1.5K to \$2.5K /mo
TIER 3 / LEVERAGE	High margin, high leverage — usually ads only, or just a few videos.	\$500 to \$1.2K /mo

These are just ranges. Your numbers will be different. We'll find yours in a minute.

— WHAT IT LOOKS LIKE ADDED UP

Meet Alex. Goal: \$20K a month.

TIER	PRICE	CLIENTS	MONTHLY
Tier 1 / Headline — full social, reels, ads	\$3,500	2	\$7,000
Tier 2 / Mid — less content, same mgmt + ads add-on	\$2,000	3	\$6,000
Tier 3 / Leverage — ads only or a few videos	\$1,200	6	\$7,200
Alex plus one part time offshore editor		11	\$20,200

Alex isn't grinding through six big retainers. She has a mix that fits her week and her life.

Your price brackets.

Worksheet two. Off the top of your head. Three prices and the kind of client behind each one.

01 / EASY

Easy to talk through and explain on the phone. Often a one-call close.

02 / HARDER

A little more intricate. Usually a two-call close, or a call and a follow up. More details to move through.

03 / HARDEST

Your headline product. If they join this, they're all in — and so should you.

05:00 FIVE MINUTES ON THE CLOCK

● ACTIVITY 02 · PRICE BRACKETS

Three prices.

Off the top of your head. Workload, margin, leverage — what you'd charge at each level.

01 EASY TO SELL

\$

Easy to talk through on the phone. Often a one-call close.

02 HARDER TO SELL

\$

A little more intricate. Two-call close, or call plus follow up.

03 HARDEST TO SELL

\$

Your headline product. If they join, they're all in — and so are you.

ONE BRACKET

Which one are you missing right now?

● CHAT ME
BACK

Which **bracket** are you missing in your business right now?

● 2
MIN

Tier 1, 2 or 3 — which one isn't there yet? Drop the number in the chat.

— 03 / YOUR CLIENT MIX

One client you do **a lot** for might actually make you less than another you do less for.

It's not about who you love and who you hate. It's a deliverable comparison. Two retainers, side by side, with the hours and the editor in the math.

— SAME SHAPE AS THE P&L — PER CLIENT

Price, costs, net margin %.

Same range as the P&L target on slide nine. The business margin is just every client's margin, added up.

— ONCE YOU HAVE THE MARGIN

Three zones. Easy call.

ABOVE
50%

Green

Sweet spot. The price is right, the scope is clean, you'd take ten more of these tomorrow.

20 TO
50%

Yellow

Viable for now. Worth watching, because if the hours creep, this drops into red fast.

UNDER
20%

Red

Costing you, or barely paying. Time for a price conversation, a scope trim, or a goodbye.

Two clients. One zone each.

Worksheet three. Pick two clients with different deliverables — one you do a lot for, one you do less for. Run them both.

EDITOR \$50 /
video

YOU / TRAVEL + \$40 /
FILM hr

01 / PICK

Two clients. Different deliverables — one heavy, one lighter.

02 / MATH

Price – (hours × 40) – (videos × 50 per video). Net margin %.

03 / ZONE

Green, yellow, or red. Circle one. Move on.

05:00 FIVE MINUTES ON THE CLOCK

Two clients. One zone each.

Pick two with different deliverables — one you do a lot for, one you do less for. Run them both and see who's actually paying you. **Editor \$50/video · You \$40/hr.**

CLIENT A — HEAVIER DELIVERABLE

NAME

Package	\$ / month	
Shoot time	hrs / month	
Management time	hrs / month	
Videos & posts	# / month	
Your time cost = (shoot + mgmt) × \$40		
Editor cost = videos × \$50		
COST OF CLIENT = TIME + EDITOR		
Net profit = package – cost		

NET MARGIN

☐ GREEN

☐ YELLOW

☐ RED

CLIENT B — LIGHTER DELIVERABLE

NAME

Package	\$ / month	
Shoot time	hrs / month	
Management time	hrs / month	
Videos & posts	# / month	
Your time cost = (shoot + mgmt) × \$40		
Editor cost = videos × \$50		
COST OF CLIENT = TIME + EDITOR		
Net profit = package – cost		

NET MARGIN

☐ GREEN

☐ YELLOW

☐ RED

RE-THINK

What's that telling you about your pricing, what you deliver, and what goes into each tier?

● LAST CHAT
CHECK

Did the heavier client win — or the lighter one?

● 2
MIN

Drop A or B in the chat. The answer is almost always a surprise.

— AND THAT'S IT

You just hawk-eyed your finances — **more than 99%** of videographers ever do.

A rough P&L, three brackets, two clients zoned. Now you can price, deliver and scale without it *feeling* like things won't work — because you can see it.

What you walked away with.

✓ **A rough P&L for your business.**

Revenue, costs, profit — and a profit margin % to steer with. No more running on feel.

✓ **Three price brackets you'd actually pitch.**

Headline, mid, leverage — and the bracket your business is missing right now.

✓ **Two clients with a net margin and a zone.**

Green, yellow, or red — and a clear view on which deliverable is quietly costing you.

— IF YOU DO ONE THING THIS WEEK

Pick one. Then close the laptop.

IF YOUR P&L FEELS OFF

Cut one thing.

Cancel one subscription you forgot you had, or raise the price on one offer. One change. This week.

IF A BRACKET IS MISSING

Draft a tier offer you're missing.

Write it as a real offer. Name, price, what's included. One page. This week.

IF A CLIENT IS IN THE RED

Re-adjust pricing expectations.

Draft the renewal conversation for clients in the red. Don't send yet. Just have it ready.

Run your business **by design.**

Not by accident. That's the whole thing.

● OPEN FLOOR

Any questions?

Come off mute, or drop it in the chat. Anything from today, or anything you're working through.
